PRESENTATION

If you look around your house you will see hundreds of objects made from dozens of kinds of materials. Have you ever wondered why manufacturer chose the materials they did for each item?

Why are frying pans made of metal and their handle is made of a special kind of plastic?

Could a cup be made of metal? Could a frying pan be made of paper or plastic?

For your activity. The students will form a group. One member will be the leader, secretary and reporter. Each group will be given a picture. They have to group the materials in the picture as metal or non metal basing on its properties. A member of the group will then present there answers to the class.
